<HTML/Front-end UI Developer/>  sumitkkundu16e@gmail.com

Profile Summary:

With 9+ years of experience as a dedicated HTML/Front-end UI developer, my core expertise lies in HTML, CSS, and JavaScript. I excel in creating responsive designs using custom CSS and frameworks, with a strong focus on micro-interactions and animations using GSAP and CSS animation. Ensuring cross-browser compatibility and hands-on experience in building web and admin UIs are integral parts of my skill set. I also worked with Laravel, Wordpress, Page Builders, Drupal, React, and Angular team to develop dynamic and robust applications.

Technical Skills:

Core expertise

HTML

CSS

Jira

Experience:

Techno Exponent (T-web Exponent Services Pvt Ltd.)

HTML Developer

2024 – Recent

Roles and responsibilities:

- Converted Figma and PSD designs into responsive web interfaces using HTML, CSS, JavaScript, jQuery, Bootstrap, and MUI.
- Developed and customized frontend components using frameworks and tools such as Laravel, Angular, React, Astro, and page builders like Elementor.
- Ensured cross-browser compatibility, responsive design, and adherence to modern UI/UX best practices.
- Collaborated closely with backend developers to align frontend implementation with backend logic.
- Identified and resolved UI issues, including layout bugs, styling inconsistencies, and performance optimizations.
- Contributed to enhancing the user experience of web and admin interfaces, focusing on functionality, accessibility, and design consistency.

Sundew

HTML Developer

2016 – 2024

Roles and responsibilities:

- Develop and maintain HTML, CSS, and JavaScript components for web and admin interfaces.
- Ensure responsiveness and cross-browser compatibility of the user interfaces.
- Collaborate closely with the backend team to integrate frontend components into Laravel, Drupal, React, and Angular applications.
- Participate in UI/UX design discussions and collaborate with designers to implement intuitive and visually appealing interfaces.
- Analyze and resolve frontend-related issues, including performance optimization and debugging.

Experience:

4i Brandz

Web Designer

2015 – 2016

- 
- Roles and responsibilities:
- Design user interfaces (UI) for web applications, focusing on usability and visual appeal.
 - Translate UI designs into HTML, CSS, and JavaScript code, ensuring compatibility with different browsers and devices.
 - Collaborate with developers to implement frontend functionality based on design specifications.
 - Conduct user testing and gather feedback for iterative UI improvements.
 - Stay updated with design trends and best practices to enhance the overall user experience.
